

Devstrom is a young Start-up developing convergent telco mash-up applications. To strengthen our developer team we are looking for:

## **Developers Mobile Applications (part & full time)**

### **You**

- could gather first experience in developing iPhone or Android applications and have ideally implemented first projects.
- have solid programming abilities in PHP, HTML and ideally Actionscript
- like working in a team and bringing in ideas
- are familiar with agile software programming.
- strive to provide the best experience to the user in terms of interaction & design

### **We**

- offer challenging and diverse projects in an innovative company.
- offer flexible working hours.
- are a young, motivated team where your contribution matters
- like trying out new things.

Please send your application including a description of your reference projects to [jobs \(at\) devstrom.com](mailto:jobs@devstrom.com).
